

RED ROOSTER LIFTING

RAISING EXPECTATIONS

COMPANY PROFILE
2021

The background of the slide is a grayscale photograph of a large bridge under construction. The bridge features a complex steel truss structure and is supported by tall concrete piers. Several construction cranes are visible on and around the bridge. The bridge spans a body of water, and its reflection is visible in the calm surface below. The overall scene is industrial and engineering-focused.

Make **Red Rooster Lifting**
your **No.1** choice for
Safer & Smarter **Lifting**

Supplying global industry with high quality **lifting** equipment solutions

Our vision at **Red Rooster Lifting** has been clear from day one; to be your lifting partner of choice; to look after every one of your lifting and load measuring requirements; getting you the equipment you need, when you need it at competitive rates.

Over **90%** of our customers rated our quality of service as outstanding.

100% of our customers were satisfied with how well we do on pricing and reliability.

We're synonymous with versatile lifting solutions delivered by a responsive, knowledgeable team with an unrivaled reputation.

There's a reason you'll see our distinctive Red Rooster logo on lifting equipment and load cells offshore and in power plants, refineries, and shipyards across the world.

It's because we're the **No.1** choice for safer and smarter lifting

About

For over 30 years **Red Rooster Lifting** has specialised in the supply, rental and servicing of **the best** powered lifting and load measuring **solutions** in the world

We are continually improving our designs and quality systems to ensure the products and services we supply are of the highest quality. We are investing in technology to streamline production and importantly we are investing in our people to promote awareness, responsibility and exceptional customer service.

You'll see our distinctive Red Rooster logo on lifting equipment and load links offshore, on assembly lines, in power plants, refineries, and shipyards across the world.

We are nothing without our people who are all equipped with the product knowledge and expert support to quickly confirm suitability, availability and pricing for all of your lifting requirements.

With our vast experience we can offer technical backup, advice on installation and assistance with breakdowns or a full repair and testing service from our rapid response maintenance facility.

Our product range covers Red Rooster air hoists, EMCE winches, KITO electric hoists, KITO manual hoists, KITO Van Leusden specialised equipment, Verton load management and Red Rooster load measuring equipment.

We have been involved in many global lifting projects over the last 30 years including the substantial Claire Ridge and Culzean offshore installations along with two very different challenges for us, the new Queensferry Crossing in Scotland and St Paul's Cathedral bell restoration in London.

Quality & Competence

At Red Rooster we are committed to quality and safety. We believe communication is key to the operation of our systems. All of our staff have the authority to intervene and stop a job if they perceive the risk to be unacceptable.

Our company systems are all included within our **BSI** registration to ISO 9001:2015. The system was first certified to ISO 9001 in 1996. Our planning, design, procurement, manufacture and inspection procedures fully reflect how our company works.

Using Inventor design software, all new designs are checked by the Senior Designer and Machine Shop Manager before equipment goes into production. Using the latest technology and standards, all Red Rooster lifting and load measuring equipment is constantly evolving. We have invested in the latest milling and turning machines to cut production times and give increased control over the tolerance and quality of parts.

The conformance with our procedures is a mandatory requirement for all personnel to ensure the company objectives are met. Throughout the manufacturing and assembly processes check lists are used to confirm quality and test results. Our QHSE department is continually monitoring, auditing and improving our systems.

We are fully registered as a supplier on **ACHILLES OIL & GAS EUROPE COMMUNITY** for the provision of products and services as detailed in our membership listed on <https://www.achilles.com/community/oil-and-gas-europe/> Achilles ID No. 00037260

As a lifting equipment manufacturer, supplier and inspector we are audited by **LEEA** the Lifting Equipment Engineers Association confirming that our procedures, reports and codes of practice all meet the current standards for lifting equipment and certification. As a full member we have access to LEEA for personnel training, guidance and experience. Certificate No. 1068

YOUR **LIFTING** TEAM

Health & Safety

In March 2020 our Occupational Health & Safety management system was certified to ISO 45001:2018. The extended scope of the system has brought many benefits to the company with the guidance of the **BSI** auditors. As members of **RBS Mentor** we also receive specialist health & safety advice on the systems that we have in place.

We are committed to the prevention of injury, ill health and to maintain a healthy and safe working environment as free from stress as is reasonably practical for it's staff and visitors, both within our works and at other work places where the company carries out activities.

Red Rooster are a **SafeContractor** approved company with our systems being audited annually. Cert No. QQ2052

Our QHSE department is committed to maintain and improve the company QHSE as laid out in our management systems and company policy statement.

COMPANY POLICY

The objectives and principles for the management of the Company, personnel, customers and suppliers are dependent on:

- The prevention of ill health and injury, the safety and welfare of all personnel, partners, visitors and customers, via the participation and consultation with workers.
- The Company Management Systems achieve their intended aims in regards to integrity, honesty, respect, financial discipline, customer satisfaction, elimination of hazards and to reduce risks.
- A commitment for continual improvement of the Management Systems and performance through hazard identification, risk assessment and determining control measures.
- To develop meaningful relationships with our customers and suppliers and to become members of relevant industry bodies.
- By listening to the needs of our customers we continue to develop our equipment, services and advice thus meeting their expectations.

To ensure that these objectives are met, Red Rooster Lifting Ltd are committed to compliance with applicable legal and other requirements such as BS EN 9001:2015 and OHSAS 45001:2018 through the incorporated Quality, Health, Safety and Environmental Management Systems.

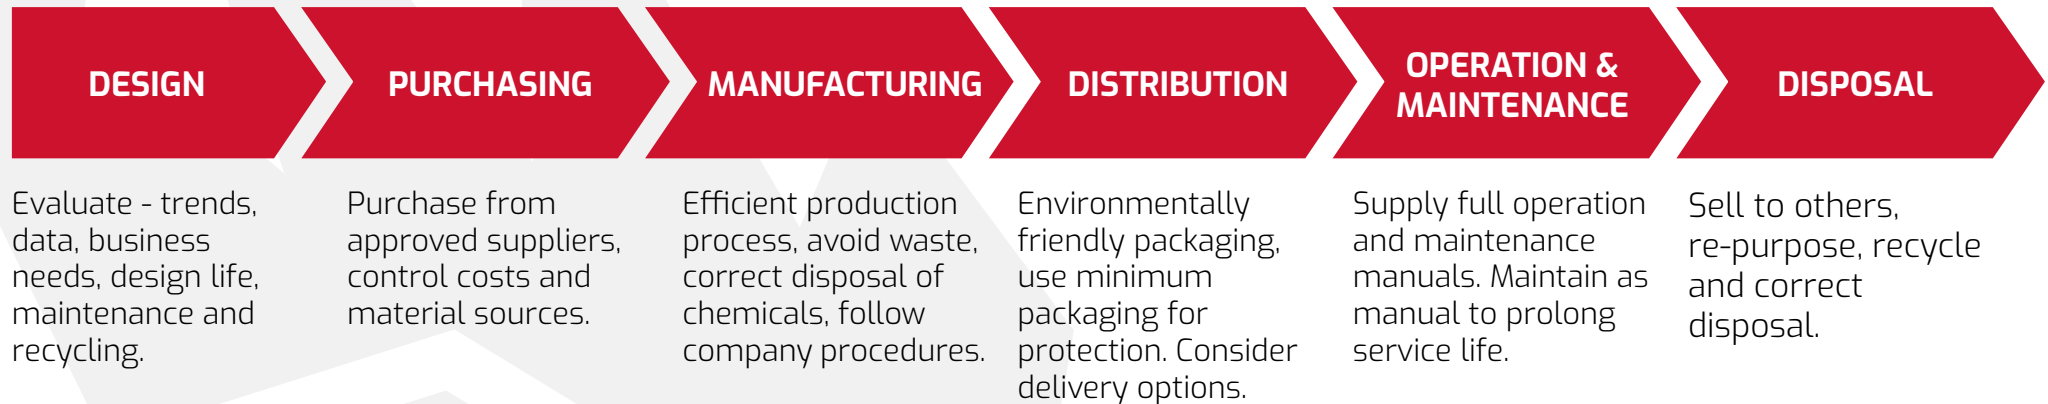

This QHSE policy provides the framework that has been established for, reviewing and accomplishing our QHSE Strategic Objectives & Targets. Compliance with this policy is critical to our business success as it reduces risk and adds value to our products and services.

Top Management are committed to the implementation of the Management Systems and the communication to all Stakeholders.

SAFER & SMARTER LIFTING

Environmental

ENVIRONMENTALLY FRIENDLY PRODUCTION

By eliminating the unnecessary, conserving resources, using safer alternatives, reducing waste, more efficient production, recycling and preventing pollution we will achieve our environmental goals.

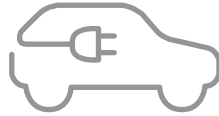

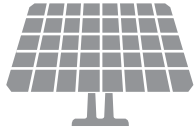

From design, to production and operation, and then ultimately when the equipment reaches the end of its useful life Red Rooster hoists minimise the recycling waste with no special requirements.

ENVIRONMENTAL POLICY

As an Environmentally conscious organisation Red Rooster Lifting acknowledge the potential environmental impact that our operations may have on the environment.

Top management have established the Environmental policy, fully support its implementation and are responsible for ensuring it is communicated, understood and implemented at all levels within the organisation.

Red Rooster Lifting's Impacts and Aspects register forms the basis for our company's Environmental impact assessment detailing activities, controls and risk rating.

LOW CARBON STRATEGY

Senior management have made the commitment to record and reduce the direct and indirect carbon emissions produced by Red Rooster Lifting.

Our Low Carbon Policy provides an overview of the company and alignment the overall company strategy with the aim of embedding the Low Carbon Strategy within the company. The company Health & Safety and Environmental policies form the basis of our planning and integration of our Low Carbon Policy.

From the Emissions Carbon Assessment carried out we have confirmed our Carbon footprint from heating, vans, cars, electricity, business flights, waste and employee car travel. The carbon data we have now available gives us a clear starting

point to clear and robust low carbon objectives, which may include carbon offsetting.

Solar panels and LED lighting are already in place, however further plans to reduce our emissions are currently being reviewed for the most suitable alternative to current equipment. The new road map will require investment, use of new technology, in-house innovation and projected business growth needs to be considered to reach long term goals.

By minimising our Carbon footprint we reduce energy cost, increase sales, find new markets, support customers low carbon goals, whilst reducing overheads through energy efficiency savings.

Services

Your **No.1** choice for safety, service, quality & integrity

We are specialists in the repair of powered hoists, winches and load measuring equipment; guaranteeing you a quality turnaround, from examination to quote and returned fully certified and repaired.

Sales

Specialist sales team equipped with knowledge and experience to produce the best lifting solutions globally. Prompt quotation and competitive prices guaranteed every time

Rental

Extensive rental fleet of over 400 air hoists, load cells and high capacity manual hoists.

Design

Bespoke lifting solutions, equipment and accessories designed and manufactured to the highest standard to meet your requirements

Product Development

We are constantly striving to deliver better products and services that create value for our customers by investing heavily in R&D. All new designs go through the same intensive design and testing program before going into manufacture. Our product range includes a diverse range of products such as load cells, hoists, trolleys, winches, swing jib cranes, overhead cranes and bespoke lifting solutions.

Services, Repair & Testing

Certified servicing, repair and testing of your powered / manual hoists, cranes, winches and load measuring equipment.

REPAIRS, TESTING, CALIBRATION, SERVICING AND EXAMINATION

Red Rooster are specialists in the repair of powered hoists, winches and load measuring equipment. Our detailed knowledge and experience means we can offer our customers a quality repair and a fast turnaround, from examination to quote and return fully certified after repair.

In stock we have a large amount spare parts to suit all Red Rooster hoists.

TEST EQUIPMENT

Every Red Rooster product is subject to the most rigorous examination and testing prior to release. In our works we can carry out dynamic testing on hoists up to 65 tonne, hoists and trolleys can lift and travel up to 30 tonne on our outside gantry and winches can be tested up to 20 tonne.

Our calibration and test rigs include tensile and compressive calibration machines up to 100 tonne and a 400 tonne tensile test and calibration rig.

RED ROOSTER REPAIR GUARANTEE:

- On receipt, the equipment is booked into the system and the job number attached.
- The equipment is then examined and dismantled for a full report and quotation to be prepared.
- Once authorised, your repair will be dealt with promptly and efficiently.
- We make every effort to make the equipment look like new.
- After repair the equipment will be function and load tested to confirm it operates as per specification.
- Red Rooster warrants the equipment against defect in our work for a period of 6 months. Misuse and lack of maintenance are specifically excluded.

Services

Site Services

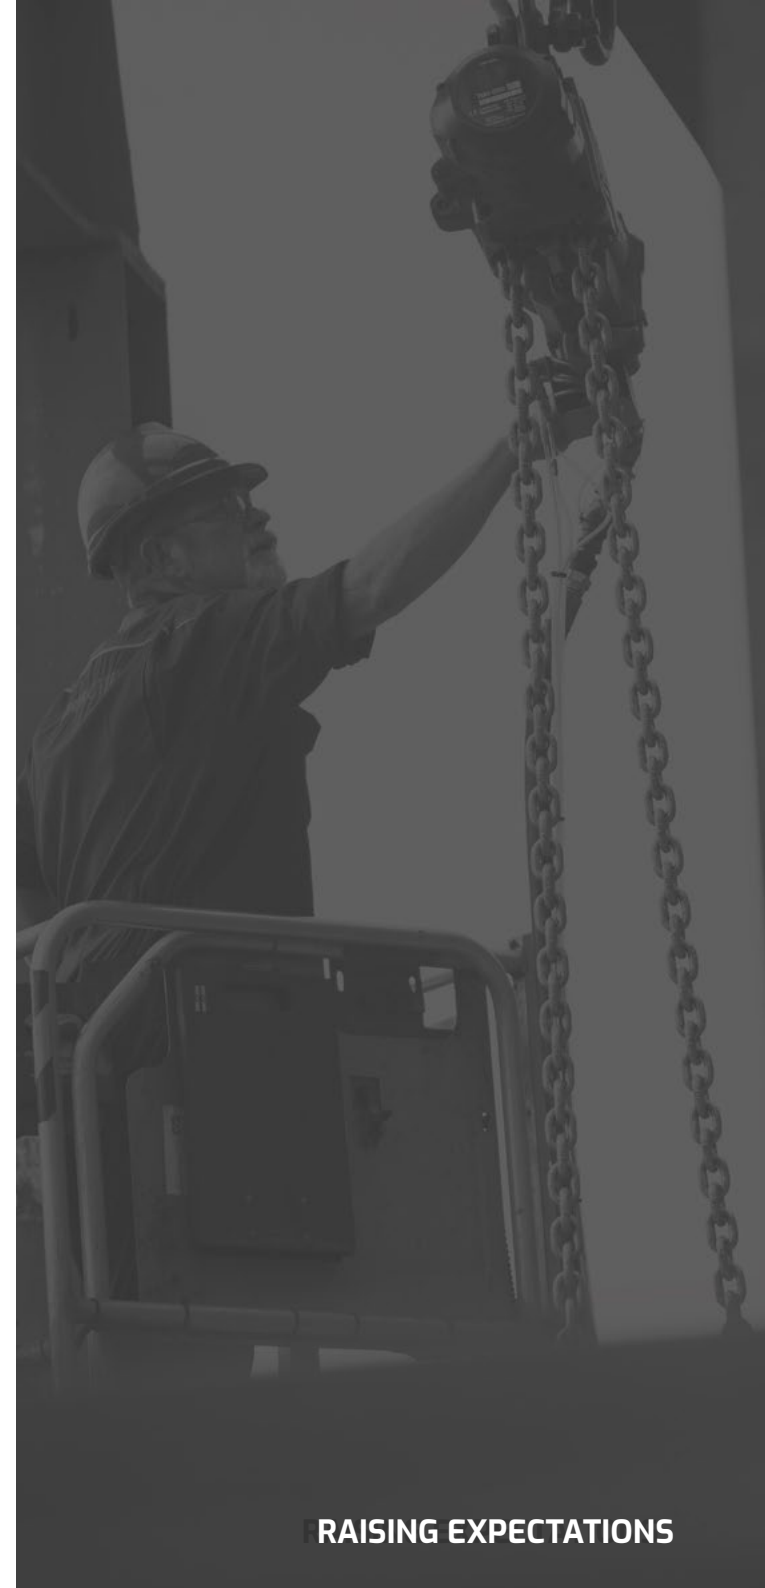

Our site services can install, commission, test, service and inspect cranes, hoists and winches. They are qualified to test and examine all types of lifting equipment and have the experience to maintain most makes of crane and carry out statutory examinations. During the examination the engineer decides if the equipment is safe to use or if repairs are required, the site report will highlight any faults to the customer before our engineer leaves the site.

We offer a fast response to breakdowns and a maintenance schedule to meet the requirements of your cranes. Keeping overhead cranes well serviced will reduce breakdowns and increase the life of the crane.

Breakdowns can be expensive and lead to loss of production as crane spares are not usually kept in stock.

Most work carried out is part of a maintenance contract so Red Rooster will advise you when the agreed service / inspection falls due, which can vary between different companies based on the conditions and lifting operations.

Our highly trained and experienced team of engineers will get your crane running again quickly at a competitive rates.

Load Measuring Calibration & Repair

Our team of load cell technicians have a vast knowledge of manufacturing Red Rooster load cells and shackles along with the repair of our own and other manufacturers load measuring equipment. From standard units to the most complex weighing systems we can test and trace the defective component before repairing and calibrating. Our range of load cells and includes ATEX / IECEx certified units.

All our calibration equipment is checked annually and is calibrated in accordance with BS EN ISO 7500-1:2004.

Rental

Extensive fleet of over 400 air hoists, load cells and high capacity manual hoists with quick delivery

Our hire rates reflect the length of hire, the quantity of equipment and specification required. From our depots in Aberdeen and West Bromwich we can supply our range of equipment worldwide at the most competitive rates possible.

By including only Red Rooster products on our rental fleet we have both the in-house expertise and spare parts available to maintain our rental fleet to the highest standard.

The full range of Red Rooster standard air hoists, trolleys and low headroom units found in this catalogue are available for hire from 250kg to 50 tonne. We have chains available to give up to 100m height of lift on the smaller models and 50m on the 35 tonne and 50 tonne hoists, but we can supply longer heights of lift for special orders.

Other items available for hire include:

- Air trolleys
- Electric hoists
- Load measuring equipment
- Large capacity KITO chain blocks
- Ultra low headroom hoists

BENEFITS

- Hiring from a company you can trust
- Fast availability of large quantities and capacities of equipment
- Delivered to your site on the day agreed ready for use
- Competitive rates, structured to take into account the hire duration
- Leave plant maintenance to the specialists (allowing you to concentrate on your business)
- Avoid capital outlay, pay for only what you use and spread out-goings throughout the hire
- Technical support: free evaluation of your requirements
- On-site assistance
- Equipment can be tailored to solve your specific needs
- Rental with the purchase option on request
- Fully certified equipment supplied with the necessary certification and rental manual
- Operators can be supplied along with the equipment

Training & Seminars

Expert training from your reliable **lifting team** for safer, smarter lifting

Red Rooster run three different types of training seminars designed to meet the needs of sales staff and service engineers.

The aim of these seminars is to develop a good understanding of Red Rooster products, where they are used and to give assistance in how to sell our products.

Where specific training in a single product or model is requested, a one day course can be arranged.

At the end of this course engineers will receive a certificate of attendance and will be more confident in the repair of hoists, cutting down on future repair time and saving on costly returns.

Training can be held at our Oldmeldrum, or West Bromwich Depots, at your own facility, or virtual courses can be held online via Microsoft Teams or Zoom.

To book your training please contact sales@redroosterlifting.com

Training & Seminars

Sales Seminar

This is a 1 day course for your internal and external staff to give them an introduction to all Red Rooster products.

The purpose of this is to develop a strong product knowledge, gain information required to quote the correct product and how to sell the benefits of Red Rooster equipment. Although questions can be asked during the course it will end with an open discussion and a questions and answers session.

Advanced Sales / Product Training

This is a 2 day course and is aimed at sales and office staff looking for a more in-depth knowledge of Red Rooster products.

DAY 1
Sales Seminar

DAY 2
Attendees will be taken through the more technical aspects of Red Rooster equipment, trouble shooting possible problems and learning how to diagnose problems over the phone. They will gain an understanding on how to identify abuse or neglect of equipment and how to improve operational safety.

Service Course

This is a 2 day course targeted at all engineers who service, inspect or maintain Red Rooster air hoists.

DAY 1
Attendees will cover all Red Rooster hoist models and the various types of equipment that go along with them. They will learn about safe operation, servicing, operational checks and trouble shooting.

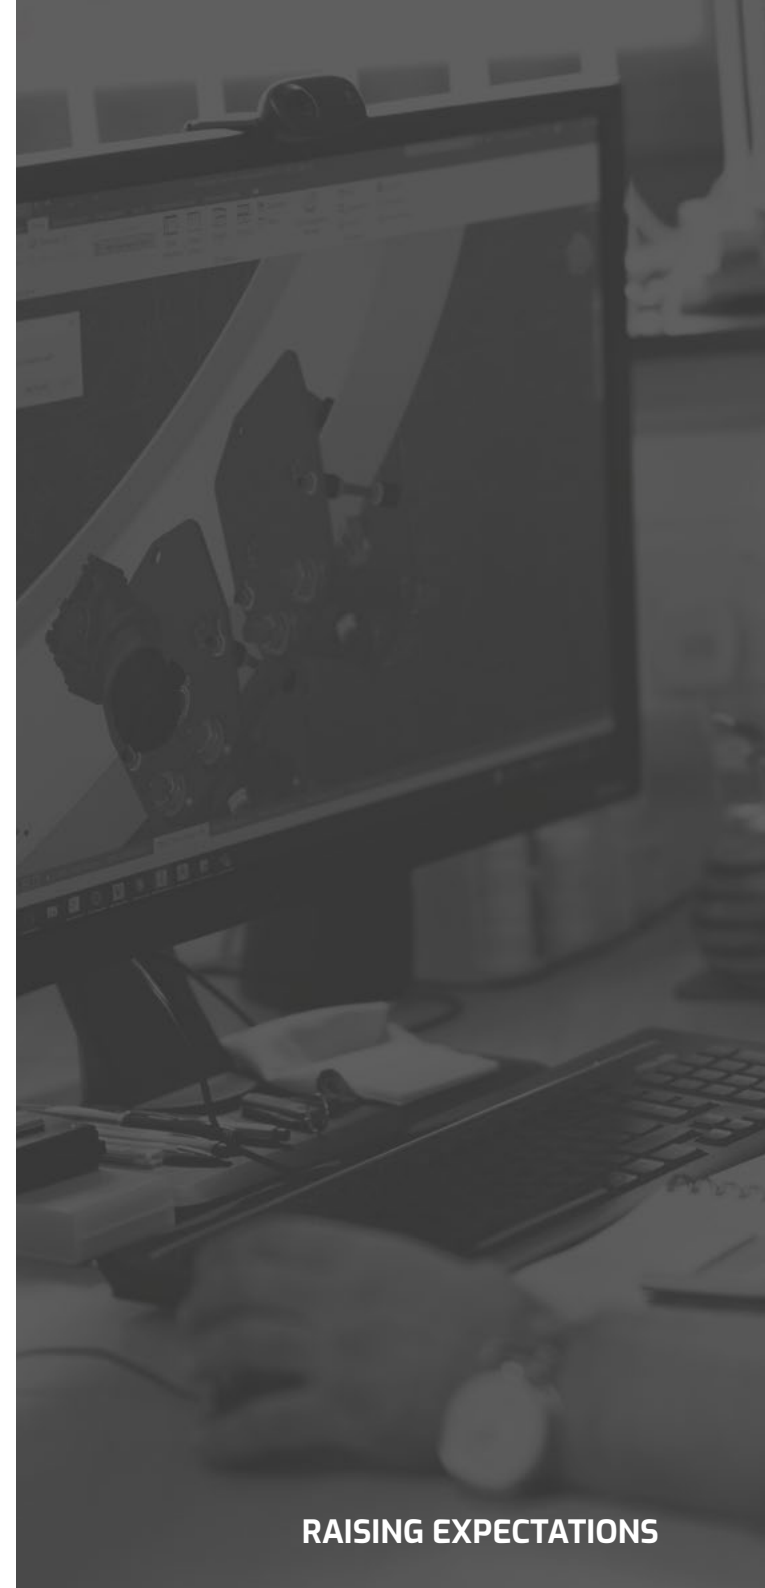

DAY 2
This will be spent working hands-on dismantling, assembling and testing hoists, learning inspection techniques, safety and how to diagnose faults. You will learn about standard replacement parts and when to replace them.

Products

The best products, available quickly, at competitive rates from a **lifting partner** you can trust

The company production processes are well defined and follow the equipment through manufacture, assembly, testing and final inspection with engineers and inspectors checking all items to ensure the quality of our products.

If you are looking for a partner that has the knowledge and experience to design, manufacture and supply the best custom lifting solutions then please contact sales@redroosterlifting.com

Products

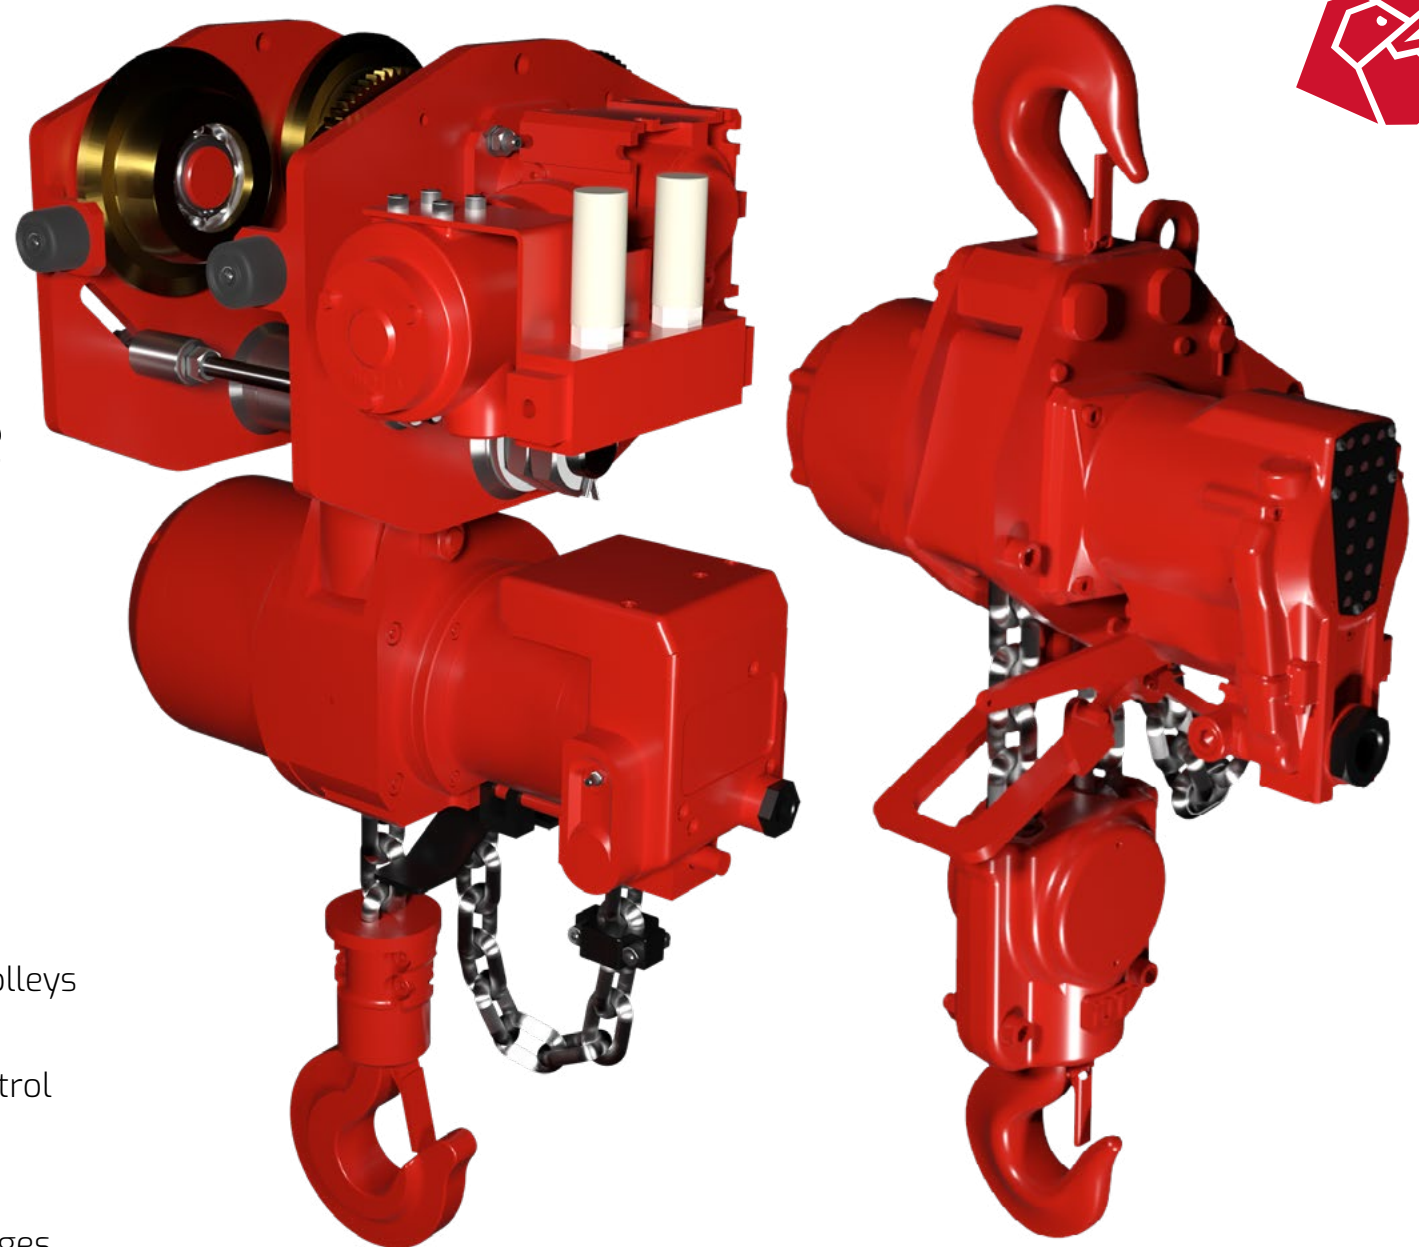

Air Hoists

Available in capacities ranging from

140kg - 100 Tonne

- Hook Suspension
- Trolley Suspension
- Lubrication Free
- Material Handling
- UK Ex / ATEX Zones 1 & 2
- 100% Duty Rating
- Overload Protection
- Upper & Lower Limits
- Lifting Points on Larger Hoists & Trolleys
- Festoon Systems
- Cord, Pendant or Radio Remote Control
- Corrosion Protection
- Marine Paint Systems
- Full Design & Documentation Packages

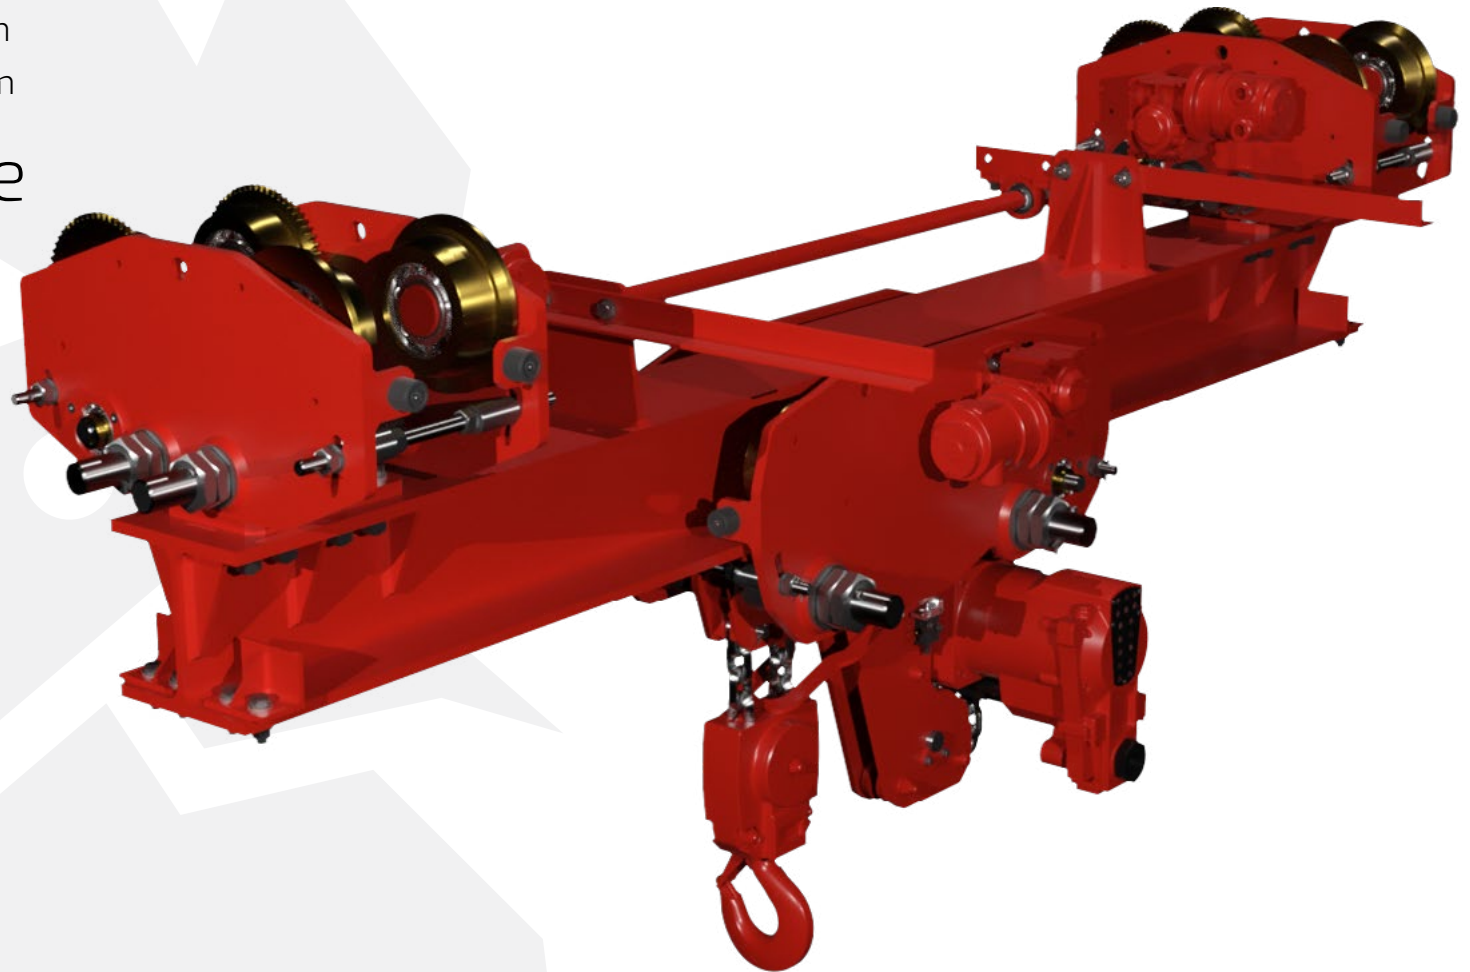

Products

Specialist RRL Designs

Designed and built to your specification
and available in capacities ranging from

140 kg - 100 Tonne

- Low Headroom Trolleys
- Ultra Low Headroom Trolleys
- Big Bag Hoists
- Articulated Trolleys
- Rack & Pinion Drives
- Overhead Cranes
- Bespoke Designs
- UK Ex / ATEX Zones 1 & 2
- BOP Hoist & Trolleys
- Air Powered Wire Rope Hoists

Products

Winches

Available as standard build or special designs fully certified to meet your requirements for Shipbuilding, Offshore, Renewables, Dredging, Construction, Engineering and Mining.

- Electric
- Hydraulic
- Pneumatic
- Man-riding
- Capstan
- Mooring
- Hand

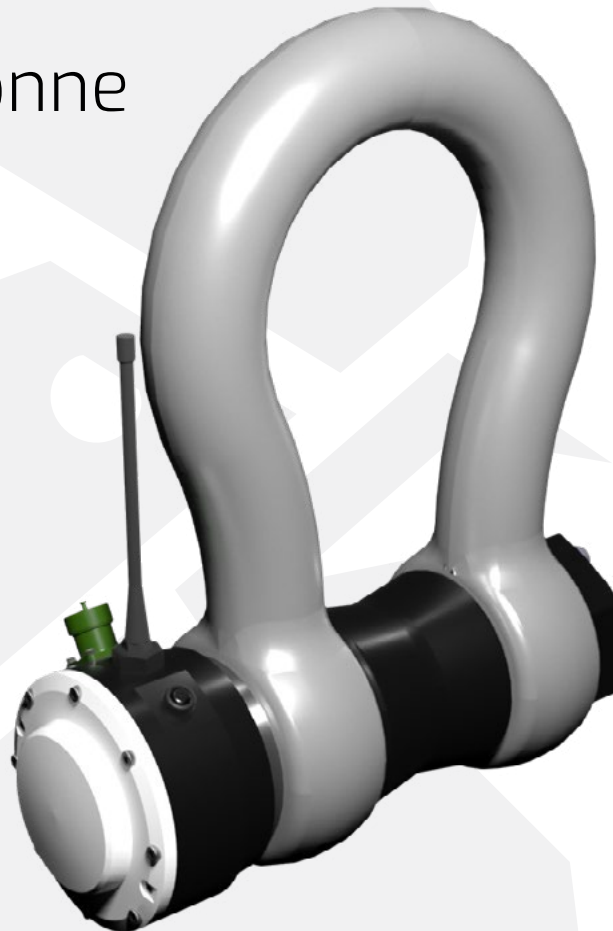

Products

Load Cell Products

Available in capacities ranging from

5 Tonne - 500 Tonne

- ATEX / IECEx Load Cells
- Cabled Load Cells
- Telemetry Load Cells
- Self-Indicating Load Cells
- Compression Load Cells
- Load Shackles
- Running Line Monitors
- Crane Scales

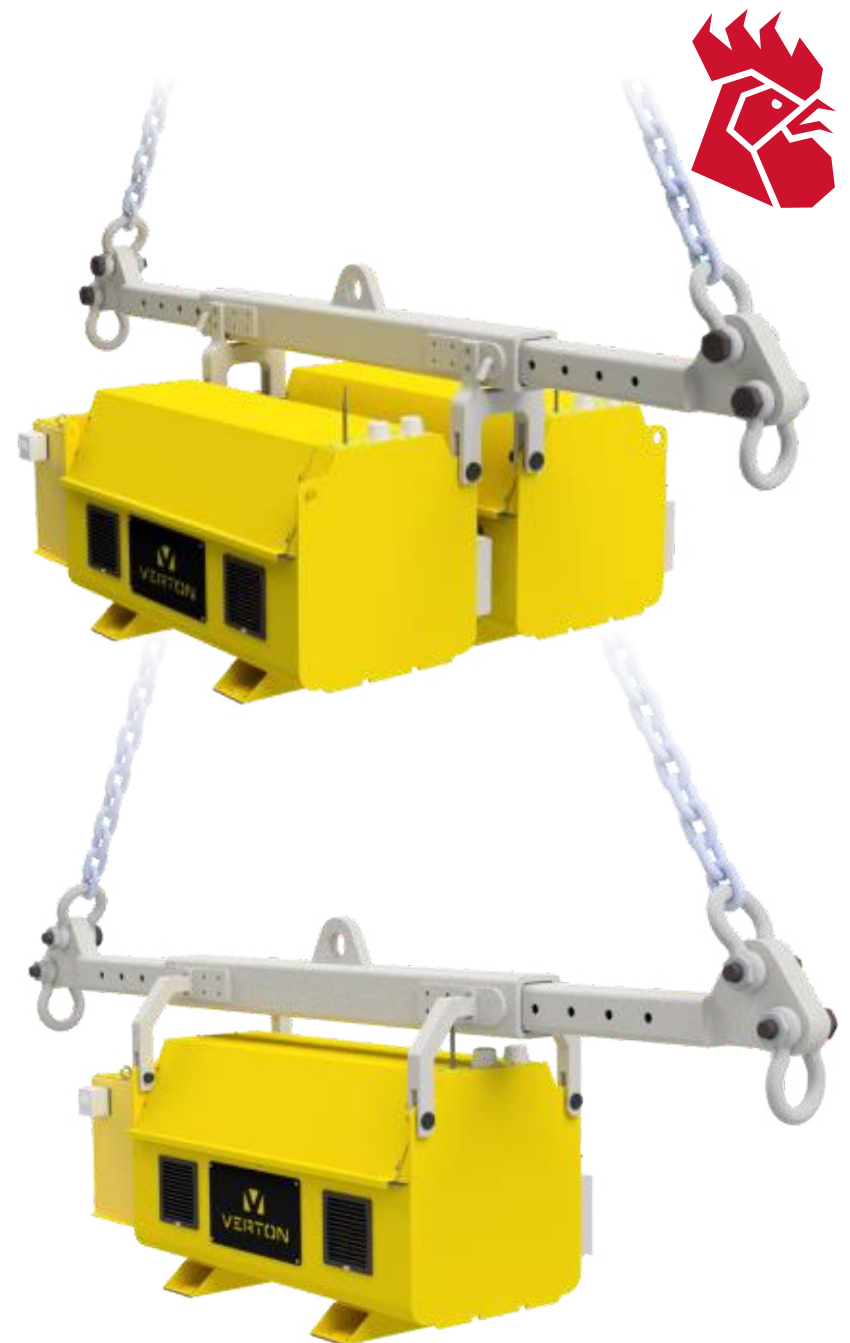

Products

Load-control solutions available in capacities ranging from

20 Tonne - 400 Tonne

- Load Management System
- SpinPods
- Modular SpinPods
- Windmaster
- Software Integration
- Remote Control

Products

KITO

PREMIUM PARTNER

Lifting solutions available in capacities ranging from

60 kg - 50 Tonne

- Lever Hoists
- Electric Hoists
- Manual Chain Hoists
- Low Headroom Chain Hoists
- Trolleys
- Beam Clamps

Products

KITO VAN LEUSDEN

Specialised lifting solutions available in capacities ranging from

500 kg - 50 Tonne

- UK Ex / ATEX Lever Hoists
- UK Ex / ATEX Trolleys
- UK Ex / ATEX Manual Chain Hoists
- Articulated Trolleys
- Rack & Pinion Trolleys
- Swinging Beam Trolleys
- Push & Geared Trolleys
- Manual Cranes

Products

KITO **ERIKKILA**

Crane Systems available in capacities

Up to 2 Tonne

- Light Crane Systems
- Monorail Hoist Tracks
- Low Headroom Cranes
- Manual & Powered Trolleys
- Jib Cranes
- Wall Mounted Cranes
- Column Mounted Cranes
- Tailored Crane Systems

A large ship is shown in a dry dock, surrounded by scaffolding and construction equipment. The ship's hull is white, and its superstructure is visible. The scene is dimly lit, with a dark sky and ground. The text "YOUR LIFTING TEAM" is overlaid on the image, with "LIFTING" in red and the other words in white.
